     https://github.com/Sourodeep-2001/Simple-Calculator

✓ **Group Projects:**

▪ *Online Employee Leave Management System*

- **Description:** *This project contains HTML, CSS, JS for (Frontend) and PHP, MySQL for (backend). Our project works with the help of XAMPP Server. The main point of view of our project is - "Employee can apply leaves to their urgent time".*
  This is basically a group project and BCA Major Project which we have been completed within 3 months.

  o **Platform used:** *HTML, CSS, JavaScript, PHP & MySQL*

▪ *Retail Management System*

- **Description:** *Retail Management System is a business management software. We use this system to create a seller, add a product, generate customers bill, generate a sales report, summarize sales, and handle account-related tasks, among other things. The project seeks to provide a system with expanded and more flexible functionalities to the shop by presenting a point of sale (POS) System as a substitute for previous manual methods.*
  This is basically a group project and MCA Minor Project which we have been completed within 3 months.

  o **Platform used***: React JS, Node JS, Express JS & MongoDB*

  o **Project Overview***:* https://www.linkedin.com/posts/sourodeep-paul-585817241_minorproject-mca-fullstackdevelopment-activity-7154139780253937664-epR3?utm_source=share&utm_medium=member_desktop

▪ **EXPERIENCE:**
